

PATRICIA *Bowden Luccardi* CTT, CNMT

Women's Holistic Health Speaker — Breast Thermography Expert

Would you like to know if there were any changes in your breasts five to eight years before you have a diagnosis?

Women need to become proactive and take control in their own health. Not just breast health, but overall health.

FACT:

Did you know by the time a lump is seen on a mammogram, it has taken five to eight years to develop.

FACT:

The lower-dose ionizing radiation used in mammography has been shown to be up to 3 to 4 times more carcinogenic than high-dose radiation.

FACT:

40% of US breast cancer cases could be prevented if people made wiser lifestyle choices.

FACT:

When thermography is added to a woman's regular breast health checkup, a 61% increase in survival rate has been realized.

Meet Patricia Bowden-Luccardi, a sought out motivational speaker on Thermography, Environmental Estrogens and Breast Health.

Drawing on over 20 years experience in the Healing Arts, Patricia captivates audiences with her ability to explore difficult topics with immense honesty, warmth and credibility.

With so much attention focused on treating breast cancer lately it is perplexing many do not recognize the great gains to be made by addressing breast cancer prevention and early detection.

Preventing cancer is far more important and powerful than simply detecting a tumor after it has already formed.

Patricia's presentations introduce participants through the most critical principles of breast health and the use of radiation-free breast cancer screening: **Thermography**.

DISPELLING FEAR-BASED MYTHS ABOUT BREAST HEALTH

How to be Proactive With Your Breast Health

- Learn about the **earliest breast cancer detection** through Thermography.
- How **environmental estrogens** and **nutritional deficiencies** are putting your breast health at risk.
- Discover **lifestyle choices** and changes you can make to improve and maintain good breast health.
- Explore case studies of **early suspicious findings** from Thermography and with intervention of nutritional and lifestyle changes the positive visual changes in Thermographic follow-ups.
- Discuss case studies of women with cancer and **how thermography detected it**.

Patricia, connects with audiences on many levels with a relevant message that resonates beyond the stage. As a conference attendee said after hearing her speak:

"Patricia's positive attitude, passion and humor transforms her listener's fears into confidence and courage enabling women to make the critical decisions and lifestyle changes. Her presentations are expertly informative on the latest research in breast cancer prevention and diagnostics. Every woman needs to experience firsthand Patricia's path breaking skills."

— Patrick Fratellone MD
Cardiology and Integrative Medicine NYC

"Patricia opened my eyes through her knowledge and strong sense of purpose to educate people about the dangers of just trusting mainstream medicine when it comes to breast health. Her lectures are backed up by facts and visuals so you can clearly understand the message and walk away with the confidence to make the right decisions for your own body."

— Mary D. Bottero
